The Impact of Machine Learning on Economics Susan Athey athey@stanford.edu Current version January 2018 Abstract This paper provides an assessment of the early contributions of machine learning to economics, as

The Impact of Machine Learning on Economics

A time series is a series of data points indexed (or listed or graphed) in time order. Most commonly, a time series is a sequence taken at successive equally spaced points in time. Thus it is a sequence of discrete-time data. Examples of time series are heights of ocean tides, counts of sunspots, and the daily closing value of the Dow Jones Industrial Average.

Time series - Wikipedia

Outstanding research and analysis underpins everything we do, from policymaking to providing secure banknotes. The Bank aims to attract and develop world-class researchers and foster an environment that supports creative freedom and engagement with global research communities.
