This page shows an example on text mining of Twitter data with R packages twitteR, tm and wordcloud. Package twitteR provides access to Twitter data, tm provides functions for text mining, and wordcloud visualizes the result with a word cloud. If you have no access to Twitter, the tweets data can be downloaded as file "rdmTweets.RData" at the Data page, and then you can skip the first step below.

A data set (or dataset) is a collection of data. Most commonly a data set corresponds to the contents of a single database table, or a single statistical data matrix, where every column of the table represents a particular variable, and each row corresponds to a given member of the data set in question. The data set lists values for each of the variables, such as height and weight of an object ...

In data mining and statistics, hierarchical clustering (also called hierarchical cluster analysis or HCA) is a method of cluster analysis which seeks to build a hierarchy of clusters. Strategies for hierarchical clustering generally fall into two types: Agglomerative: This is a "bottom-up" approach: each observation starts in its own cluster, and pairs of clusters are merged as one moves up ...

ICDATA, the International Conference on Data Science, is the renamed former International Conference on Data Mining, DMIN, which was held in the past thirteen years. Therefore, we will continue with the 14th conference on this topic. We hope that the new name (and acronym) will be more attractive and reflect a more modern perspective – although the content itself has not changed dramatically ...
