

Geographic Information Systems (GIS)

The department's mapping and spatial data library are managed through Geographic Information Systems (GIS). Several tools and websites let you view and create maps, perform analysis and download our spatial data.

Geographical Information Systems (GIS) Concept of Operations

A geographic information system (GIS) consists of computer hardware and software, georeferenced data on environmental or cultural attributes, and data about the data " or metadata. A GIS can facilitate the organization, analysis, and mapping of land-use and land-cover data. Digital spatial data may be in two forms: raster or vector (Figure 1). ...
