Mechanisation is the process of changing from working largely or exclusively by hand or with animals to doing that work with machinery. In an early engineering text a machine is defined as follows: Every machine is constructed for the purpose of performing certain mechanical operations, each of which supposes the existence of two other things besides the machine in question, namely, a moving ...

### **Mechanization - Wikipedia**

Mechanical engineers advance the world we live in by constantly improving and inventing technology, not just preserving existing systems. Making our lives easier and everything we use more efficient, mechanical engineers are responsible for some of the most innovative breakthrough designs of our times; such as The London Eye, wind turbines and surgical robotic technology.
