Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, early delivery, and continual improvement, and it encourages rapid and flexible response to change.

- As you make decisions, there are going to be stakeholders who you need to involve in the process. Now, in terms of stakeholder involvement, there are a lot of challenges, but there are huge benefits to doing so. There are some processes and tools that you can use to appropriately involve stakeholders along the way. In terms of challenges, first, you need to know who to involve in the ...

What's really important in your life? Leading time management expert Chris Croft explains that the objective of time management is to maximise the time spent on the important things. How choosing short term enjoyment can lead to the price of regret in the long term. How to get the balance right between short enjoyment and long term achievement.
