A natural product is a chemical compound or substance produced by a living organism—that is, found in nature. In the broadest sense, natural products include any substance produced by life. Natural products can also be prepared by chemical synthesis (both semisynthesis and total synthesis) and have played a central role in the development of the field of organic chemistry by providing ...

### **Natural product - Wikipedia**

In chemistry, an organic compound is generally any chemical compound that contains carbon. Due to carbon's ability to catenate (form chains with other carbon atoms), millions of organic compounds are known. Study of the properties and synthesis of organic compounds is the discipline known as organic chemistry. For historical reasons, a few classes of carbon-containing compounds (e.g., carbonates ...

Organic body piercing jewelry from natural materials like plugs, septums, and labrets in amber, bamboo, horn, bone, stone, wood, and tribal jewelry. Wholesale and retail.

### **ORGANIC: Natural Body Jewelry**

Inspiring and motivating students from the moment it published, Organic Chemistry has established itself in just one edition as the student's choice of an organic chemistry text. The second edition refines and refocuses Organic Chemistry to produce a text that is even more student-friendly, coherent, and logical in its presentation than before. Like the first, the second edition is built on ...
