In time management, timeboxing allocates a fixed time period, called a timebox, within which planned activity takes place. It is employed by several project management approaches and for personal time management.

### **Timeboxing - Wikipedia**

In mathematics, the binary logarithm ( $\log_2 n$ ) is the power to which the number 2 must be raised to obtain the value  $n$ . That is, for any real number  $x$ ,  $2^x = n$ . For example, the binary logarithm of 1 is 0, the binary logarithm of 2 is 1, the binary logarithm of 4 is 2, and the binary logarithm of 32 is 5. The binary logarithm is the logarithm to the base 2.
