Compared to the work dealing with trends of temperature, the number of publications is nevertheless quite small. In general climate change analysis of recent trends of global radiation is rather seldom examined. This analysis is focused on long time series with a duration of at least 40 years.

Analysis of recent trends of global radiation ground

Recent radiotherapy innovations have led to increases in the precision of treatments, which allows improved outcomes and reduced treatment-related side effects. Notable developments to date are in the areas of intensity modulated radiotherapy (IMRT), stereotactic body radiation therapy (SBRT), 4D imaging, particle therapy and nanotechnology.

Specific Trends in Radiation Oncology | Planning for the Best

The practice of radiation oncology is advancing rapidly, but even as the technology evolves, it is the power of partnership that is key to improving care. Novel collaboration with radiology, payers and the patients themselves are changing the way treatments are delivered.
