Art Benjamin (2010-05-29) Casting out nines Figure out the missing digit in a large product of two integers. Effect: The magician hands out a 3 or 4-digit integer chosen by a spectator in a previous part of the show. Using a pocket calculator, another spectator multiplies that number by some secret 3-digit number which he chooses freely and keeps for himself.

Magic Items and Detect Magic. When detect magic identifies a magic item's school of magic, this information refers to the school of the spell placed within the potion, scroll, or wand, or the prerequisite given for the item. The description of each item provides its aura strength and the school to which it belongs. If more than one spell is given as a prerequisite, use the highest-level spell.

Case study: Train schedules. I recently created a program for planning trips on BART, the San Francisco bay area subway system, in the form of a "Dashboard widget" (mini-application) for the Apple Macintosh.. The design has clearly been successful. Even though the target audience is fairly small (SF bay area public transportation riders with the latest Mac OS and knowledge of how to ...
