In computer science, a value is the representation of some entity that can be manipulated by a program. The members of a type are the values of that type.. The "value of a variable" is given by the corresponding mapping in the environment. [citation needed] In languages with assignable variables it becomes necessary to distinguish between the r-value (or contents) and the l-value (or location ...

2 . calling for a return to an exploration of the "IT" that underlies all IS research (Orlikowski and Iacono, 2001) thus underlining the need for IS design science research.

DESIGN SCIENCE RESEARCH IN INFORMATION SYSTEMS

Axiology (from Greek $\acute{\alpha}\xi\iota\omicron\lambda\omicron\gamma\iota\alpha$, axia, "value, worth"; and $-\lambda\omicron\gamma\iota\alpha$, -logia) is the philosophical study of value. It is either the collective term for ethics and aesthetics, philosophical fields that depend crucially on notions of worth, or the foundation for these fields, and thus similar to value theory and meta-ethics. The term was first used by Paul Lapie, in 1902, and Eduard von Hartmann ...

The presence of liquid water at the base of the martian polar caps has long been suspected but not observed. We surveyed the Planum Australe region using the MARSIS (Mars Advanced Radar for Subsurface and Ionosphere Sounding) instrument, a low-frequency radar on the Mars Express spacecraft. Radar profiles collected between May 2012 and December 2015 contain evidence of liquid water trapped ...
