Over 12,000 ASTM standards operate globally. Defined and set by us, they improve the lives of millions every day. Combined with our innovative business services, they enhance performance and help everyone have confidence in the things they buy and use.

ASTM International - Standards Worldwide

A respirator is a device designed to protect the wearer from inhaling particulate matter, including airborne microorganisms, fumes, vapours and gases. There are two main categories: the air-purifying respirator which forces contaminated air through a filtering element, and the air-supplied respirator in which an alternate supply of fresh air is delivered.

Respirator - Wikipedia

How do you decide what you need? Specifying louvre is a compromise between airflow and water ingress. Each project should be considered independently, to take into account the particular needs of each application.
