An essential oil is a concentrated hydrophobic liquid containing volatile (easily evaporated at normal temperatures) aroma compounds from plants. Essential oils are also known as volatile oils, ethereal oils, aetherolea, or simply as the oil of the plant from which they were extracted, such as oil of clove. An essential oil is "essential" in the sense that it contains the "essence of" the plant ...

Essential oils are perceived as growth promoters in poultry diets (Zhang et al., 2014). Animal trial results, however, are considerably variable. Table 1 gives a summary of the factors which could influence the efficacy of essential oils for both poultry and pigs. These factors relate to the experimental essential oils, animals, diets, and environment.
